

HCCA CI Tech Tips

Thank you for joining our live virtual meeting! Below is a helpful guide with tech tips for troubleshooting video player or platform related issues that you may experience during the event.

Questions? Contact HCCA virtual production partner, Soliman Productions at spvirtualteam@gmail.com

Interactive Lobby

You can interact with our virtual lobby by clicking on any button in the image. If you do not see an image like the one below upon logging into the site, you may have a browser compatibility issue. Keep reading for help troubleshooting.

Inability to see the video player or interactive images

Change your browser

If you see a black box or no visible player on your screen, try using a different web browser. We recommend [Google Chrome](#) or [Firefox](#) for best compatibility. This will also help you troubleshoot an inability to see our interactive lobby image.

Check your cookies preferences

If using a different browser didn't work, please ensure that your browser preferences are set to allow cookies. Here are the settings for [Google Chrome](#) and [Firefox](#).

Delete your cookies

If you are already on one of our recommended browsers and have the settings mentioned above enabled, try deleting your cookies by pasting the text below into your browser's address bar and following the on screen prompts.

Google Chrome: chrome://settings/privacy

Mozilla Firefox: about:preferences#privacy

Though we strongly recommend the above browsers, below are the cookie settings for Safari, Internet Explorer and Microsoft Edge.

Safari: preferences>privacy> uncheck "block all cookies" manage website data, remove all. ([online guide](#))

Internet Explorer:

1. In Internet Explorer, select the Tools button, point to Safety, and then select Delete browsing history.
2. Select the Cookies and website data check box, and then select Delete.

Microsoft Edge:

1. Open the new Microsoft Edge and then select Settings and more > Settings > Privacy and services.
2. Under Clear browsing data, select Choose what to clear.
3. Under Time range, choose a time range.
4. Select Cookies and other site data, and then select Clear now.

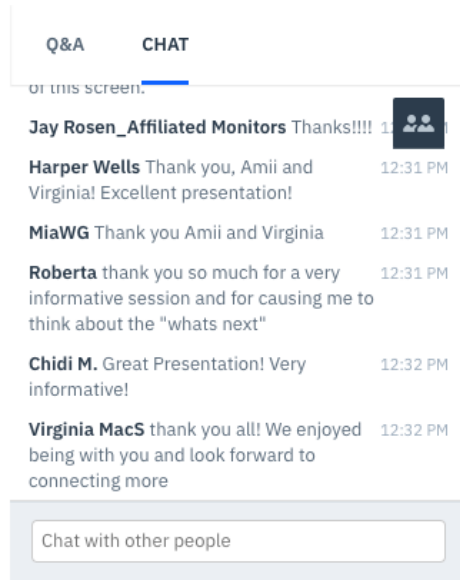

Disable Firewall Settings

If you are on a company computer or a computer that is connected to a company VPN, there may be a firewall setting that is blocking the player from showing. Please disconnect from your VPN or try accessing the site on a personal device such as a tablet or cell phone. You can also ask your company to whitelist the event domain.

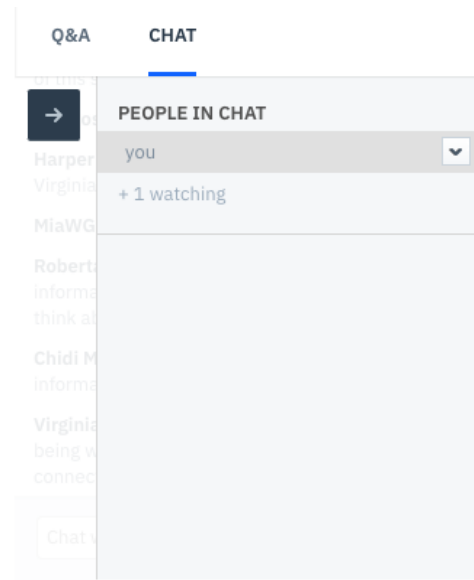

Changing Your Chat Name

You can change your chat name by selecting the person icon in the top right corner of the chat box player (**Step 1**) and then clicking on your name (**Step 2**) and renaming yourself (**Steps 3 & 4**). You may have to hover your mouse over that area in order to see the icon.
