

HOW DO YOU KNOW IF YOUR COMPLIANCE PROGRAM IS EFFECTIVE?

MARTI ARVIN , JD, CHC-F, CEPP-F, CHPC, CHRC
VP Audit Strategy, CynergisTek, Inc.

Agenda

- Using the OIG/HCCA Resource Guide
- Demonstrating Program Effectiveness
- Key Takeaways
- Questions

Using the OIG/HCCA Resource Guide:
Ways to assess the effectiveness of a
compliance program

What the OIG/HCCA Resource Guide Is 

- A tool in your toolbox
- A guidance document for assessing compliance program's effectiveness.
- A more objective (although still subjective) view of what OIG might be looking for in assessing effectiveness.

 4

What the OIG/HCCA Resource Guide Isn't 

- A checklist or roadmap for assessing compliance program's effectiveness.
- A guarantee that your program will be deemed effective if you measure and trend everything.
- A statement that your program won't be deemed effective if you measure and trend other things.
- A be all and end all for effectiveness nor is it a one size fits all

 5

Understanding the background 

- OIG and HCCA identified the Detailed Content Outline for the CHC exam as the starting point, why?
- What the DCO is:
 - An outline of what the typical compliance professional might spend their time on
 - It is based on a job analysis performed by a psychometric firm.

 6

Ways to use the Resource Guide 

- Review the breakdown of the seven elements
- Identify what is within the oversight of your compliance program
- For those items outside the oversight of your program assure an understanding of what is being done in those areas

 7

Ways to use the Resource Guide 

- Identify and breakdown the metrics by
 - What metrics your program already gathers
 - Those that are not currently tracked
 - Could the metric be readily tracked?
 - Why don't you currently track the item?

 8

Ways to use the tool 

- For the metrics you currently track look at
 - Are they the same as what the guide suggests?
 - Are they different?
- Consider the adage "What gets measured gets done"

 9

What metrics do you currently use? 

- Develop metrics that matter
 - Are they measurable?
 - Do they correlate to the seven elements?
 - Do they serve to inform regarding the compliance risks?
 - Do they correlate to compliance efforts and outcomes?

 10

Challenges you might find 

- Not all meaningful criteria is measurable
 - Senior leadership engagement in the program
- For de-centralized compliance units there might be
 - Lack of access to data
 - Inconsistent measurements because of disparate systems
 - Lack of leadership support at the local level
- Lack of leadership support for the overall program

 11

Review other items in the Resource Guide 

- What surveys do you use to assess the program?
 - Usefulness of P & Ps
 - Awareness and perception of the program
 - Culture of the organization
 - Incentive method consistent with the compliance program
 - Peer organization surveys to compare practices with industry standards

 12

Review other items in the Resource Guide

- Are you auditing the items the Resource Guide suggests such as
 - Policies for your high risk areas
 - BOD minutes that reflect compliance discussions and approval of the annual work plan
 - Compliance with training requirements
 - Employee
 - BOD

One approach to metric development

Determine What to Measure	<ul style="list-style-type: none">• Gather data – internal and external to the organization• Develop preliminary metrics	Management buy-in and support
Determine How to Measure	<ul style="list-style-type: none">• Accumulate initial data set to "test" the usefulness of preliminary metrics• Make adjustments to metrics, as appropriate	
Implement	<ul style="list-style-type: none">• Implement ongoing metrics reporting and analysis process	
Reassess	<ul style="list-style-type: none">• Re-evaluate and refine metrics to ensure they are useful and relevant	

Reminders

- You probably are not doing everything in the guide, that is ok
- Use it as a tool
- You might be tracking an item in a different way than suggested.
 - Assess why and see if you are comfortable that it gets to the same end.

Other tools to consider 

- HCCA Publication, *Evaluating and Improving a Compliance Program*, January 2003
- DOJ Criminal Division, Fraud Section Publication: *Evaluation of Corporate Compliance Programs*, January 2017
- OIG Compliance Program Guidance documents
- AHLA/OIG/HCCA/AHIA Publication, *Practical Guidance for Health Care Governing Board on Compliance Oversight*, April 20, 2015

 16

Demonstrating effectiveness 

 17

Why it is difficult to show effectiveness? 

- There are no objective measures
- It is a little bit of an “I know it when I see it”
- It is difficult to compare your program to others because providers and programs are unique
- OIG/HCCA Resource Guide and DOJ outline of questions posed to organizations help

 18

What shows effectiveness?

- Established compliance program goals and metrics to track progress on those goals
- Evidence that the compliance program
 - identified risk areas and assessed compliance with those areas
 - identified problems before outside sources brought them to provider's attention
 - responded quickly, thoroughly, and appropriately when a problem was identified

What type of metrics should you have?

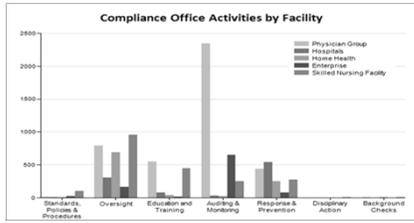

- Consider a method of showing in a concise manner what the program is doing
 - Across risk areas
 - Across the seven elements of an effective compliance program
 - In the current fiscal year
 - Over the course of fiscal years

Styles of metrics

The chart displays the following approximate data points:

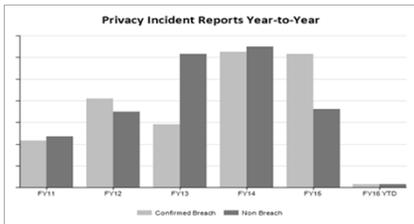

Category	FY11	FY12	FY13	FY14 Actual	FY15 Forecast
Standards, Policies & Procedures	50	50	50	50	50
Overnight	500	600	550	500	400
Education and Training	200	250	200	250	200
Auditing & Monitoring	500	800	600	1000	500
Response & Prevention	200	300	250	400	200
Disciplinary Action	100	150	100	150	100
Background Checks	0	0	0	0	0

Key takeaways

Takeaways 

- There will be no effectiveness without a compliance structure
- Engaging the Board and senior leadership in compliance is critical
- Demonstrate effectiveness through risk assessment, proactive internal audit, and quick response to issues
- Creating a culture of transparency and accountability will increase effectiveness.
