What is Compliance?

- Doing what is right?
- Doing whatever the government says?
- Doing what's legal?

What Will Get You On TV?

- Relationships between physicians and hospitals, between physician groups, and between health care professionals/facilities and drug/device companies that run afoul of the law.
- Coding problems.
- Confidentiality snafus.

Medicare Antikickback Statute

- It is illegal to offer, solicit, make or receive any payment intended to influence referrals under a federal health care program.
- The government applies the “one purpose” test. If one purpose of the payment is to influence referrals, the payment is illegal.
- Can payments inside an organization violate the law?

56 F.R. 35952 (July 29, 1991)

“Comment: Many commenters requested the OIG to clarify that payments between corporations which have common ownership are not subject to the statute. Commenters cited as examples intracorporate discounts and payments between two wholly-owned subsidiaries. Some commenters argued that referral arrangements between two related corporations do not constitute “referrals” within the meaning of the statute, and suggested that the OIG define the word “referral” to exclude such activity.

Response: We agree that much of the activity described in these comments is either not covered by the statute or deserves safe harbor protection. **We believe that the statute is not implicated when payments are transferred within a single entity, for example, from one division to another. Thus, no explicit safe harbor protection is needed for such payments.**

Potential Antikickback Problems

- Relationships with pharmaceutical/device manufacturers:
 - Research studies;
 - Freebies:
 - Lunches;
 - Super Bowl tickets.
- Joint ventures.
- Investment in outside organizations.
- Professional courtesy discounts (“don’t charge him, he’s a good referral source”).

Baptist Medical Center

- Medical director agreements between a hospital and two physicians.
- Physicians were paid \$60,000 year.
- Hospital executives sent emails explaining they didn't want to impose a large burden on the physicians.

Baptist Jury Instruction

In order to sustain its burden of proof against the hospital executives for the crime of violating the antikickback statute, the government must prove beyond a reasonable doubt that the defendant under consideration offered or paid remuneration with the specific criminal intent "to induce" referrals.

Baptist Jury Instruction

To offer or pay remuneration to induce referrals means to offer or pay remuneration with intent to gain influence over the reason or judgment of a person making referral decisions. The intent to gain such influence must, *at least in part*, have been the reason the remuneration was offered or paid.

Baptist Jury Instruction

On the other hand, defendants Anderson, Keel, and McClatchey cannot be convicted merely because they hoped or expected or believed that referrals may ensue from remuneration that was designed wholly for other purposes. Likewise, mere oral encouragement to refer patients or the mere creation of an attractive place to which patients can be referred does not violate the law. There must be an offer or payment of remuneration to induce, as I have just defined it.

You're Training Physicians On E&M Coding. What Should You Tell Them Happens If They Err?

Role of Documentation: The Law

"No payment shall be made to any provider of services or other person under this part **unless there has been furnished such information** as may be necessary in order to determine the amounts due such provider or other person under this part for the period with respect to which the amounts are being paid or for any prior period."

Social Security Act § 1833(e)

**Role of Documentation:
Guidance from CPT and CMS**

- The CPT Assistant explains: "it is important to note that these are *Guidelines*, not a law or rule. Physicians need not modify their record keeping practices at all."
CPT Assistant Vol. 5, Issue 1, Winter 1995
- Then HCFA, now CMS publicly stated that physicians are not required to use the Documentation Guidelines.

Salary Surveys: Death of Common Sense (and Math)?

- Survey says?
 - Is 50th percentile a ceiling? What about 75th? 90th?
- Conventional wisdom in this area is awful. True analysis seems rare.
- FMV is supposed to ignore presence of referrals. Is that even possible?

Surveying the Environment

- Meghan Wong at MGMA has explained "the data are not intended to be used as an academic data set for extrapolating to the U.S. population of physicians," and are not a "one-to-one representation of the universe of medical practices that are in the country."^{*}
- High and low responses are thrown out.
 - ^{*}Thanks to Tim Smith, Ankura Consulting, and Forthcoming BVR/AHLA Guide to Valuing Physician Compensation and Healthcare Service Arrangements

Surveying the Environment

- Do people understand "total compensation?"
- Is there an inverse relationship between productivity and per RVU compensation?
- Do groups comply with the "professional data only, no technical fees" request?

Analyze This

- 90th Percentile Interv. Card. CF in 2012:
AMGA: \$102.06 MGMA: \$86.47
- 90th Percentile RVU IC.:

2010 18,316
2011 16,136
2012 15,208 (20% swing from 2010!)

Fraud, Waste and Abuse and Compliance Training

- Lots of lingo, very complicated regulations.
- Plans say hospitals and clinics are “first tier downstream and related entities” (“FDR”).
- Plans may expect you to perform fraud, waste and abuse training and compliance training.
- They cite 42 C.F.R. 422.503 (b)(4)(vi)(C) and 423.504 (b)(4)(vi)(C).

(b) Conditions necessary to contract as an MA organization. Any entity seeking to contract as an MA organization must:

- (4) Have administrative and management arrangements satisfactory to CMS, as demonstrated by at least the following:
 - (vi) Adopt and implement an effective compliance program, which must include measures that prevent, detect, and correct non-compliance with CMS' program requirements as well as measures that prevent, detect, and correct fraud, waste, and abuse. The compliance program must, at a minimum, include the following core requirements:

42 C.F.R. 422.503 (b)(4)(vi)(C)

(C) (1) Each MA organization must establish and implement effective training and education between the compliance officer and organization employees, the MA organization's chief executive or other senior administrator, managers and governing body members, and the MA organization's first tier, downstream, and related entities. Such training and education must occur at a minimum annually and must be made a part of the orientation for a new employee, new first tier, downstream and related entities, and new appointment to a chief executive, manager, or governing body member.

(2) First tier, downstream, and related entities who have met the fraud, waste, and abuse certification requirements through enrollment into the Medicare program are deemed to have met the training and educational requirements for fraud, waste, and abuse.

42 C.F.R. 422.503 (b)(4)(vi)(C)

(3) An MA organization must require all of its first tier, downstream, and related **entities to take** the CMS training and accept the certificate of completion of the CMS training as satisfaction of this requirement. MA organizations are prohibited from developing and implementing their own training or providing supplemental training materials to fulfill this requirement.

Things to Note

- Regulations refer to “the CMS training” without defining it.
- Regulations say Medicare suppliers and providers are exempt from FWA training.
- The reference to “CMS training” comes after this waiver.
- How does an “entity” train?

General Compliance Training

Sponsors must ensure that general compliance information is communicated to their FDRs. The sponsor’s compliance expectations can be communicated through distribution of the sponsor’s Standards of Conduct and/or compliance policies and procedures to FDRs’ employees. Distribution may be accomplished through Provider Guides, Business Associate Agreements or Participation Manuals, etc.

- Medicare Managed Care Manual Ch. 21 Sec. 50.3.1

The Complication

- The Manuals haven't been updated since the regulations.
- The regulations and Manuals don't really apply directly to you.
- "Your contract controls!"

Who "Must" Train?

In order to prevent unnecessary burden on FDRs, Sponsors should work with their FDRs and specify which positions within an FDR must complete the training. There will be certain FDRs where not every employee needs to take the training based on their duties.

Below are examples of the critical roles within an FDR that should clearly be required to fulfill the training requirements:

Positions/Roles

Senior administrators or managers directly responsible for the FDR's contract with the Sponsor (e.g. Senior Vice President, Departmental Managers, Chief Medical or Pharmacy Officer);

Individuals directly involved with establishing and administering the Sponsor's formulary and/or medical benefits coverage policies and procedures;

Who "Must" Train?

Individuals involved with decision-making authority on behalf of the Sponsor (e.g. clinical decisions, coverage determinations, appeals and grievances, enrollment/disenrollment functions, processing of pharmacy or medical claims);

Reviewers of beneficiary claims and services submitted for payment; or,

Individuals with job functions that place the FDR in a position to commit significant noncompliance with CMS program requirements or health care FWA.

60 Day Rule: 42 CFR § 401.305(a)(2)

“A person has identified an overpayment when the person has, or should have through the exercise of reasonable diligence, determined that the person has received an overpayment and quantified the amount of the overpayment. A person should have determined that the person received an overpayment and quantified the amount of the overpayment if the person fails to exercise reasonable diligence and the person in fact received an overpayment.”

What Is Knowingly?

“While we acknowledge the terms ‘knowing’ and ‘knowingly’ are defined but not otherwise used in Section 1128J(d) of the Act, we believe that Congress intended for Section 1128J(d) of the Act to apply broadly. If the requirement to report and return overpayments only applied to situations where the providers or suppliers had actual knowledge of the existence of an overpayment, then these entities could easily avoid returning improperly received payments and the purpose of the section would be defeated.”

- 81 FR 7660

Is Six Years Right?

“*Overpayment* means any funds that a person has received or retained under title XVIII of the Act to which the person, after applicable reconciliation, is not entitled under such title.”

- 42 CFR 401.303

•If the contractor can't reopen the claim, doesn't that mean you are entitled to keep the money?

Six Years From When?

- Remember “identify” includes quantification.
- The six years runs from the date the overpayment is quantified not from the first suspicion of an overpayment.
- Operationally, this may be challenging.

The Malingering

Medicaid Audits

- Medicaid audits you. Your documentation does not meet the Guidelines, but you have good evidence you provided the service. Should you worry?

The Public Complaint

- A patient is very upset with care.
- The family writes a letter to the local paper.
- The paper calls you and offers you a chance to respond.

The Subpoena

An employee receives a grand jury subpoena from Atlanta that says "The United States Attorney requests that you do not disclose the existence of this subpoena. Any such disclosure would impede the investigation being conducted and thereby interfere with the enforcement of the law."

Off-Label Use

- A drug is approved for a particular use. The company asks physicians to give a speech describing an off-label use for the drug. Any issues?
- Must a physician tell the patient a use is off label?
- Must an insurer cover it?

A Patient Walks In With Fake I.D.

- What do you do if a patient comes in with an insurance card and you KNOW that the card is for someone else?
- CAN you report the patient? MUST you report the patient?

855 Issues

- Forms matter
- Penalties for non-compliance with enrollment and claims requirements
- Medicare enrollment forms (855A and 855B)
- Reporting requirements and timeframes
- Pitfalls of Medicare claim forms
- Responding to written inquiries from the government

“Background Questionnaire”

- A safeguard contractor asks you to list model, manufacturer, etc. of all diagnostic equipment in your practice.”
- You “certify” that the information is “complete and accurate.”
- You agree to “advise” them of “changes that subsequently occur with respect to any of the information provided.”

Deactivation of Billing Privileges

- CMS may “deactivate” billing privileges for the following reasons:
 - Provider/supplier does not submit Medicare claims for 12 consecutive months.
 - Provider/supplier does not report a change to information supplied on the enrollment application within 90 days of the change (e.g., change in managing employee or billing services).
 - Provider/supplier does not report a change in ownership or control within 30 days.
- No bar on reactivation.

46 © 2017 Fredrikson & Byrum, P.A.

Revocation of Billing Privileges

- CMS may “revoke” billing privileges for the following reasons:
 - **“Noncompliance” with enrollment requirements or the enrollment application.**
 - Exclusion of provider/supplier or owner, managing employee, authorized or delegated official, medical director, supervising physician or other healthcare personnel of provider/supplier.
 - Certain felonies.
 - Certifying as “true” false or misleading information on the enrollment application.
 - Failure to furnish within 60 days complete and accurate information requested by CMS in connection with enrollment or revalidation.

47 © 2017 Fredrikson & Byrum, P.A.

Revocation of Billing Privileges

- Grounds for revocation (continued):
 - Failing an on-site review.
 - Misuse of billing number.
 - Abuse of billing privileges.
 - Failure to report a final adverse action or change in practice location within 30 days.
 - Failure to document or provide CMS access to documentation of certain lab, home health, DMEPOS, imaging and specialist services.

48 © 2017 Fredrikson & Byrum, P.A.

Revocation of Billing Privileges

- Once CMS has revoked billing privileges, the provider/supplier is barred from re-enrollment for at least 1 year and no longer than 3 years, based on the severity of the non-compliance.
- Upon re-enrollment, must submit a new application and be resurveyed and recertified, if applicable.

A Visitor: What Would You Do?

- A typo-filled email requests access to your clinic.
- The person arrives and asks to take a bunch of pictures of your clinic, including your DME inventory?

Advanced Imaging Notice

- Give written notice to all MR/CT/PET pts. (E-mail is ok.)
- At time of referral (i.e. NOT registration).
- Must indicate patient can go elsewhere.
- Address/phone for at least 5 "suppliers" within 25 miles. (If fewer than five, list them. If none, no notice necessary.)
- Can say more; may wish to warn about insurance coverage.

Every Violation Isn't Fraud: Universal Health Services v. United States ex rel. Escobar

"Likewise, if the Government required contractors to aver their compliance with the entire U. S. Code and Code of Federal Regulations, then under this view, failing to mention noncompliance with any of those requirements would always be material. The False Claims Act does not adopt such an extraordinarily expansive view of liability."

But Interest Isn't A Charge For The Service.

- "The charge for a missed appointment is not a charge for a service itself (to which the assignment and limiting charge provisions apply), but rather is a charge for a missed business opportunity. Therefore, if a physician's or supplier's missed appointment policy applies equally to all patients (Medicare and non-Medicare), then the Medicare law and regulations do not preclude the physician or supplier from charging the Medicare patient directly."
