TMLT Risk Assessment

TMLT’s cyber risk management experts will visit your practice to determine your risks and vulnerabilities to cyber security threats. Our comprehensive assessment is designed to address the HIPAA Privacy; Security; & Breach Notification Rules and the Texas Medical Privacy Act.

TMLT Risk Management Plan

- based on the results of your TMLT Risk Assessment, we will help design a Risk Management Plan, as well as assist with updating your Policies and Procedures and in conducting workforce data security training.

TMLT

*All TMLT policies include cyber coverage with limits of \$100,000 per claim and \$100,000 per policy period for physicians. Group limits are \$100,000 per claim and \$500,000 per policy period. Increased limits and enhanced cyber coverage are available for purchase from TMLT.

Because not all cyber policies are the same, TMLT can help you purchase customized, stand-alone cyber insurance. We can also advise you on coverage benefits to protect against your cyber risks.
